subttinraubung/windows-7-ultimate-x86-x64-compressed-900mb ... This repository does not contain any tags. As I wrote above, in my case there was a "wrong" version of Subttinraubung. Actually, it was "correct"... here's what the file looks like. On my system, all the tags were indeed there. In this case, I just removed all the tags in the file and everything worked. I can't explain why my system didn't detect it right away, but it did. It's not really that important, but I don't want this repository to spread like a virus on the Internet. Thanks guys for your help.
